Summary

I'm an analytical and detail oriented android app developer professional with stellar communication skills with a hunger and drive to use my already gained skills to the aid of a company by conceptualizing app solutions with the latest technology, designing theory, paired with a large dose of creativity. I'm committed to viable and easily functional app solutions for clients. I am a hardworking University Student seeking employment, committed to utilizing my skills to further the mission of a company while using my skills to help others with 3 years of experience building various Android applications.

Experience

KnownAfrique | Nairobi County, Nairobi
Junior Android Developer | 12/2020 - 05/2021
This was a short term internship I did where my team and I were assignmed the task of improving the ui, updating the company's code base, clean up code and other minor bug fixes that faced the organization's Android application. We were able to complete the given tasks to expected standards and were given the opportunity to continue with the internship as a result of it.
